Following Severe Disease

during which there has been considerable disturbance of metabolism, recovery frequently "hangs fire".

This is often due to an inadequate supply of the "chemical foods", calcium, sodium, potassium, manganese, phosphorus, and iron. These, together with the "dynamic" effect of small doses of quinine and strychnine, usually overcome such physiological inertia.

Compound Syrup of Hypophosphites

TRADE "FELLOWS" MARK

is the ideal form in which to administer the above, being bland, stable, non-irritating and efficient, to which 60 years of increasing use bear witness.
